

Section 3.8 Chapter 15 Program Activities Throughout the Region ('Regionwide')

The RWQCB regulates disposal of waste to land under Chapter 15, Division 3, Title 23 of the California Water Code. 'Chapter 15' applies to wastes which cannot be discharged directly or indirectly to water of the State and therefore must be discharged to land for treatment, storage, or disposal. Types of operations within the Region which are subject to Chapter 15 include solid waste disposal sites (landfills), industrial wastewater ponds (surface impoundments), septage and sludge disposal.

Priorities for FY 02/03 are shown in the chapter Appendix A.
